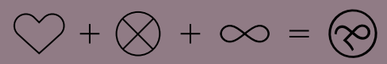
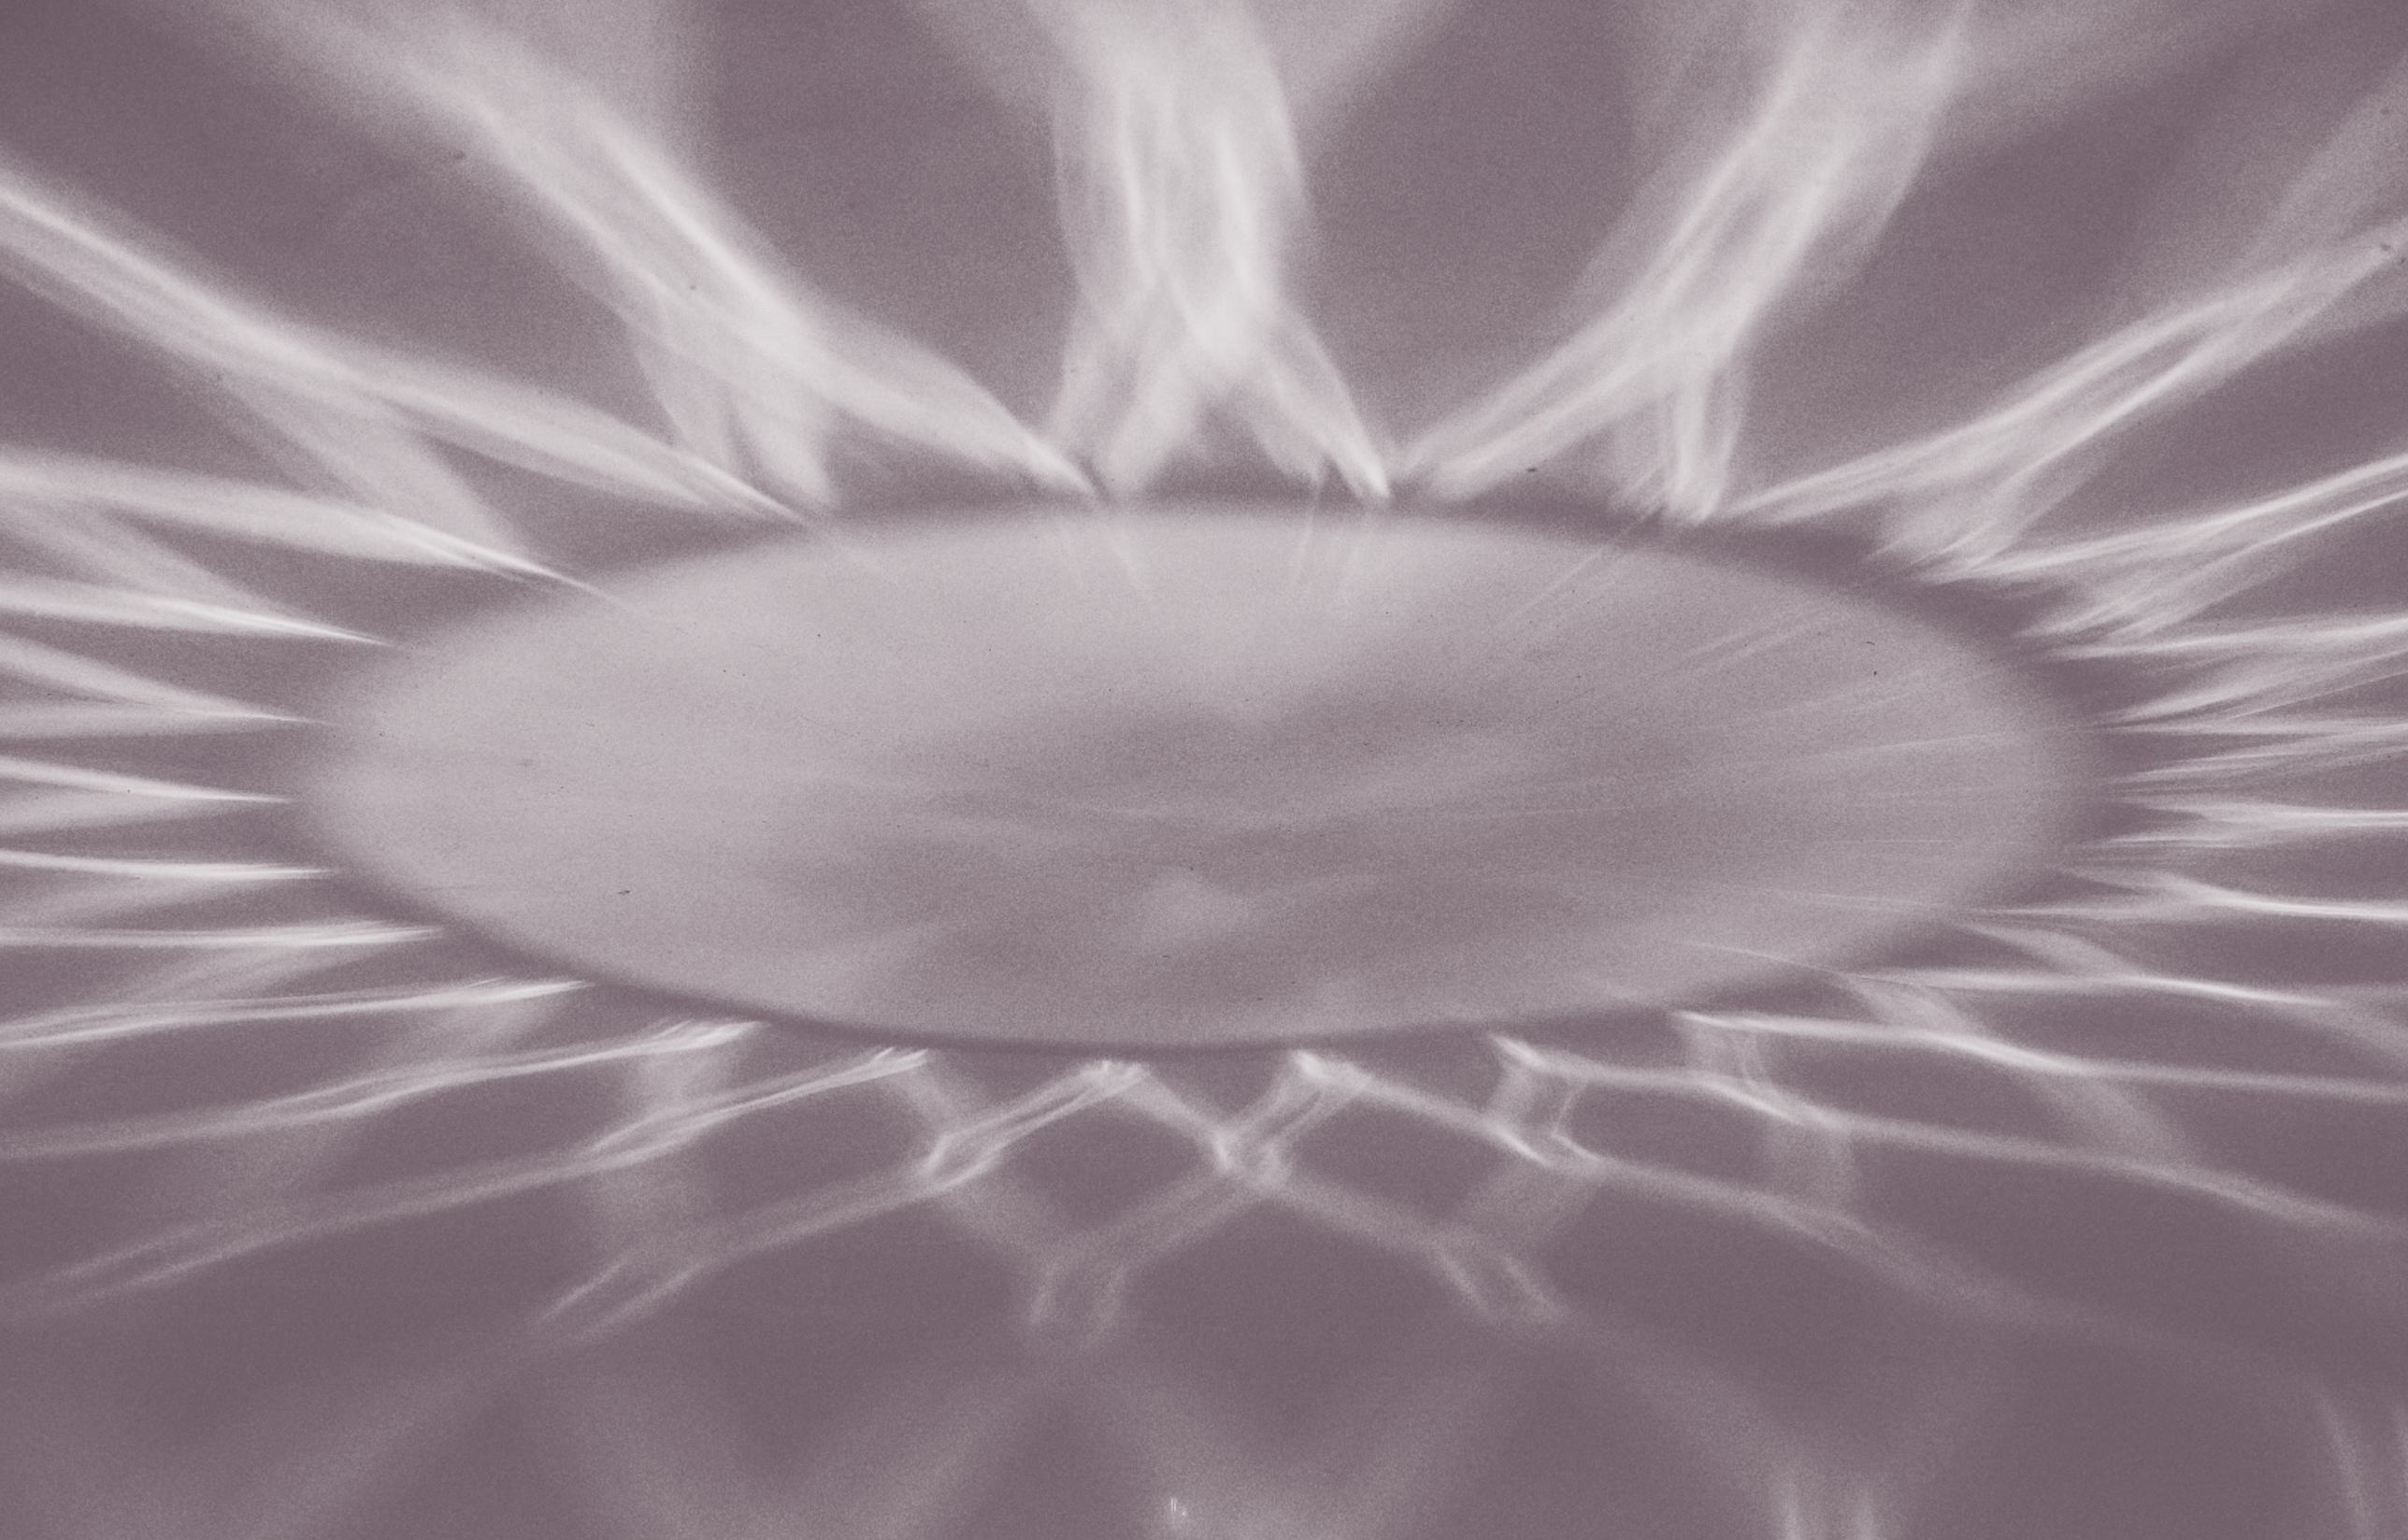
The Beauty of Glass
Lighting Collections
2021/Volume III

LASVIT



The visualization of the products in this catalogue is solely illustrative. Due to the manufacturing process by hand, the factual appearance of the products and their parameters may significantly differ from the visual information in this book.



PROLOGUE

Beauty has not been here for a mere ten years. It'd been here since time immemorial, long before we began to worship it. It emerges, nurtures, fades. The dynamic power of the universe, of the planet, of the people. Of you and of me, of all life in all its forms.

Sparks in the eyes, inner flame, flames of passion, jealousy, eruptions on the Sun, invisible signals, floods of emotions. Not belonging to anyone, including us – the handful of devotees spreading the message in its name.

Just what is the Czech Republic and the few worldwide branches? These few hundred years of glassmaking tradition, those masters of the craft, this Leon Jakimič? What is design, or art? Who has the right to take themselves so seriously to place their ego above nature, and impose their judgement on beauty? On the way it's supposed to look, and on the way it's supposed to be viewed. No one, not even you.

Mere mastering the change of state – it's only sand, and then glass. Arts, procedures, nonsense about energy, wasting it or saving it. Market manipulations and light-speed races in disciplines that do not and never did exist.

Let it be, it's already set. Try to be free. Let live the coincidences, moods, feelings, and emotions. Smiles and astonishments. Eyes narrowed or wide open. All the rays, flashes – data, if you will. Stories. Hearts aflame, even if uncomfortable. Yes, even laughter, tears, and magic.

It's not about us, we're only trying for the light beaming somewhere to make an imprint. In the right moment – forever, perhaps – in glass and in such manner to make you gasp for air and turn blind with astonishment: "What beauty!"

For this, we love glass, for this we do it.
Try to understand, and who knows – maybe you'll join in.

All the clowns' faces eaten away by
greasepaint, ballerinas' ruined feet,

acrobats' broken vertebrae,
sculptors' crushed fingers, actors' coke-
induced nasal perforations, solo singers'

teared vocal cords, guitarists'
ripped off fingernails, DJs' deaf ears,
screenwriters' smoked lungs, painters'

etched lungs, snapped muscles in
glassblowers' faces.
All that beauty

hurts.

What if you're mistaken, dear Albert? What if there's nothing left that holds true? That barely anything which we measure, passing through ourselves by millions per second, bearing no resemblance to matter? Do these particles faster than light weigh anything but the journey? Higgs bosons, you holy grail of physics...

WHERE THE HELL ARE YOU?

Forget the world's biggest festivals.
The greatest ROCK'N'ROLL of all is
happening outside of them, regardless
of the misdirected crowds of fans.
The largest pit is in fact to be found
hundreds of feet beneath each one
of us. Who of you happens to dare
jumping in the downward lift cage and
fall all the way to the core of things?
To the place burning hot as HELL where,
after the dark gives way, the beauty can
struck you blind. Here, this is
what's happening.

Did you not know that?
The most beautiful things come to being
under pressure.

Crystal Rock

Time flows between the legs like nothing,
i. m. 2 mg/kg. Here it is, at last. Everything stops.
The wave is a dune.

I've got 20 minutes, while the wave is a event horizon.

Everything stands still, as if surfing

I'm all patience, only receptors went berserk.

NMDA, SIGMA, and PCP2 like the Holy Trinity,

where silver drops would glitter, now grains of gold

I count.

**“C’mon over ’ere, my lil’ one.
Your’re my little wooden
DARLIN’, wha’ do they
know, right?**

**With what we’ve been
through, you and I... you’re
my own – why,
Unlucky, they say...
I won’t give you up – ever!**

**Oh, my little wooden
wonder, after all those years
we’ve been together, you’re
imprinted in me – in my
HEART that’s here for you
and you only.”**

What
if modern
technology helped
us replicate ancient
decorating methods without
having to faithfully imitate
them? What if we could now do
what our ancestors had thought
impossible? What if our
cutting-edge technology
looked like magic
to them?

After
long and
painstaking study of
the old arts coupled with
state-of-the-art R&D, we have
discovered lithyalin. No longer do we
need to painstakingly cut gem-stone
mined underground in the sweat of
a person's brow. No longer do we have
to layer colored glass in order to trim
it back in stratified patterns. We can
now get truly inspired and let our
imagination fly. We can finally
do things our way. We have
the technology.

I write these lines with great trepidation. In all my time on this godforsaken plateau in the middle of nowhere, I have never seen anything quite as wonderful. My hand is still shaking with the excitement... By ~~gahhh~~ golly, I've found it!!! The legendary Volcano the old explorers ~~[illegible]~~ spoke of – it's real!

One would be hard pressed to find a better example of local craftsmanship. The northern Bohemian region is full of these old volcanic cones, and we can see why the simple natives would feel awe and inspiration looking at these primordial shapes jutting out from their ancient landscape.

Now, I must somehow pilfer ~~[illegible]~~ this wonderful artefact from the small company which owns it, but that should be a simple task... A small gift of the local monies, and it will be all mine!!!!!!

STOP. Everything that was true a while ago is no longer so. What once was breathable air suddenly went liquid and is now translucent glass. Loose sand / running lava / hard, amorphous glass. Who knows how it came to pass? Everything's a matter of perspective, broken reality between the living and the dead, between true and false, between beauty and ugliness. What shall be? Who knows — it doesn't have to be, here and now, and yet may have a value.

If, apart from radiant energy, you wish to accumulate kinetic energy, set your SPIN spinning to use its moment of inertia.
Kinetic energy Ek bound in a spinning flywheel is calculated by the following formula:

{\displaystyle E_{k}={\frac {1}{2}}J\omega ^{2}}

where J stands for the body's moment of inertia in relation to rotation axis, and ω for the angular velocity of the spinning body. As angular velocity is directly proportional to frequency ({\displaystyle \omega =2\pi f}), the following formula also applies:

{\displaystyle E_{k}=2\pi ^{2}Jf^{2}}

where f stands for rotation frequency in rounds per second.

Imagine waking up one day and everything
being the opposite around. Getting up in late
afternoon and falling asleep, weary,
in the morning. Cold lunch at midnight
and a warm pint at dawn. Liquid chocolate and
cellophane-wrapped chocolate-fondue bars.
Vases growing out of flowers on the table.
All the way to the ceiling, to beauty.

WE ALL WANT IT SO MUCH.
WE CANNOT LIVE WITHOUT IT. THE
FREEDOM OF CHOICE. WE WANT
TO MAKE OUR OWN DECISIONS.
NOBODY'S GOING TO TELL US
WHICH WAY TO GO. FREEDOM!
WHAT ARE WE SUPPOSED TO
NOT DO? IS THIS SUPPOSED TO
BE FREEDOM? WHY NOT. AM
I ALLOWED TO HAVE THIS
THOUGHT? PERHAPS, BUT WHY?
OR THAT THOUGHT, MAYBE?
WHO'S SUPPOSED TO KNOW?
DO WE SPLIT OURSELVES IN TWO?
SEIZE TO EXIST? AND WHY NOT?

There's times you
get stressed to the
point when nothing
goes right, times
you feel like shit.
Other times you
know
a
pinch is enough
for you to be able
to work under
pressure. Have
a cup of espresso
and, despite your
stomach being in
knots, fight and
wring the best
out of yourself.
Everything comes
loose and flows out.
And then comes
the relief. And thus,
over again and
again, we block our
happiness while
trying to express
ourselves.

“Mmmmmm,
I want a
lollipop!”
“Again?” “Dad said
it’s OK!”

Another quick-saccharide bomb explodes.
Flood of saliva leaching the dissolving sugar.
Coloured smiles, dilated pupils reminding of
past, present, or future rose-coloured glasses.
All of that goes up. Haaappineeess. Cortisol
deceives the brain which doesn’t know it’s got
more than enough, thus requiring ever more.
Once again. And another lollipop.

“Just
one more,
mum, a last one,
please –
I prooomise!”

Ludwig van Beethoven, Ludwig II of Bavaria,
Ludwig Mies van der Rohe, interview, meanwhile...

I.

Beethoven: "There's a lot to do in the world. Do it quick."

Rohe: "Architecture, for one. Architecture is the will of given era transposed into space."

?!

Beethoven: "And what am I, assessed from the perspective of the universe?"

Ludwig II: "An eternal mystery to myself and others alike."

Rohe: "Less is more, believe me!"

!

II.

Beethoven: "OK, I'll slow down: I'll be heard in heaven."

Ludwig II: "OK, just don't forget one thing: God is in the details."

Beethoven: "Tell me about it. I don't want to be interesting, I want to be good."

Rohe: "But that's MY line."

Beethoven: "Does it matter?"

!?

How dreadful it must have been before.
Thinking about the sun while waiting for
the rain to come.

And now?
A rainbow whenever you feel like it.
Whenever you think about it.

How dreadful it must have been before.
Thinking about love while waiting for a stone.

And now?
A diamond whenever you feel like it.
Whenever you think about it.

It’s
all so clear.
Yet you always
find a way to
complicate it all. An egg.
No need to dispute what
came first. Forget cells, black
holes, mathematics, or fractals.
Looking at its perfect curves,
there’s no reason to bother with
the infinite universe, not even
the inner one. Yes, the egg
means life, but let it be for
once and try to perceive
only one thing.
Its beauty.

The moment it strikes Bořek, a bang is heard. Mind you – not the kind of splash in the water that makes no difference. A major strike, a hit that throws everything that's ever been and ever will be out into the great wide open. Glass in one direction, form and substance in others. Three styles here at once, and light all around. And here, ladies and gentlemen, our entire culture is on the move.

Designed by Bořek Šípek

You keep quiet.

The awe-inspiring aura of the fungi is not here by mere chance. They were the reason for you to come down from the trees. You should be praying and sacrificing everyone. Everyone claiming that something that's been here for millions of years merely sponges on something else, which at best will uproot and wither in couple of hundred years! Who parasitizes on whom? Is this not the claim of those creatures who think have genes while the GENOM has them?

EVE??? 🍎You out of your mind? WTF? 🌪️⚡ That was a bit too much, wasn't it? Was it necessary? We had a deal! 😠😭 What am I to do now? How can I count on you?
10:14

Oh Adam, this breaks my heart. 💔💔💔💔💔 It's happening by itself.
10:17

You're a treacherous bitch! 💀
10:18

🙄💘 Silly. Things with no seeming connection have their own rules. That's the fucking geometry He talked about. You can't have everything set up in points. There's rarely an obedient short line between the beginning and the end.
10:23

Stop lecturing me, will you? And those see-through skirts?
10:24

Last time you gave me a hard time about being dressed all in black. 🕶️🕶️ Do you even know what you want?
10:29

Will I see tomorrow?💞💋

All of a sudden, you have the strength, wow now. Ever since you met the Golem. You know best what your shem is, and that it's to be put into the forehead. Yes, you can believe your eyes, it's not one of numerous stars falling down to your feet – it's all that's been known so far by men. "Golem, stop," you said. AMEN.

IF CZECHIA IS THE FUSTY VALLEY WHERE POISONS EAT AWAY ALL THE BRILLIANT IDEAS, THINGS, AND PEOPLE, THEN PRAGUE IS HERE TO SHOW HOPE THAT THERE IS A WAY OUT. NOT ACROSS THE BORDERLINE HILLS, BUT UPWARDS, RIGHT FROM THE MIDDLE. THEY'RE NO SPIRES FILTERING THROUGH THE IRON CURTAIN, THESE ARE ROCKETS AND THAT'S WHY THERE'S HUNDREDS OF THEM. YOU SAY THEY'RE CHIC? AND ASK HOW MANY OF THEM HAD BEEN LAUNCHED? WELL, THEY'RE FOSSILIZED AFTER ALL THOSE YEARS, ALTHOUGH WE ALL WANT OUT AND AWAY. FOR GOOD, NOT JUST FOR A WEEK LIKE YOU, MR. VLADIMIR.

Hey kids, now listen carefully.
There are fairy tales, like this one
about the tooth fairy, told truthfully.

Once a little girl for whom
they'd left no sweet, now
threatening with vengeance,
li'l Medusa indeed.
A teardrop for each tooth,
a treat cup designed to soothe.
And so the tooth enamel of ours,
the protector of our pearls,
reigns the joy and happiness
of all boys and girls.

Do you believe the bees build their combs hexagonal simply to fit their six-legged build?

Are the bees connected to a universe where all is preprogrammed, hence they simply do what they're set to?

Or are the poor little things simply trying to create circles and the much-adored shape is coming up by a sheer coincidence?

Could this all be one single truth?

Y o u
know they say it's
best to stop when the going's
best. Right before the finish. Not
everything needs to be cut, trimmed, and
polished to the point of spoiling the entire
thing. Park your car a few blocks away from
your house and walk the rest. Why? The highest
percentage of car accidents happen within the last

STOP, RIGHT NOW.

few miles away from the waiting hot bath. Stop being
persistent, do not insist on finishing, and discover the
charm of what comes to pass the moment before
undressing, before peeing onself from tickling,
before climaxing. Because it's not always
a matter of life and death, and, at times,
you feel cold instead of joy and
you feel like running
away.

The visualization of the products in this catalogue is solely illustrative. Due to the manufacturing process by hand, the factual appearance of the products and their parameters may significantly differ from the information presented in this catalogue, including the product pictures. The company Lasvit s.r.o. hereby reserves the right to change any parameters presented in this catalogue. The appearance and parameters of the ordered products shall be based on individual agreements and respective contractual documentation.

Ecology
Maximum attention is given to design and manufacturing processes, responsible use of resources, and careful choice of materials and technologies, in order to achieve energy balance.

Heritage
Lasvit represents Czech glassmaking artistry and tradition through breathtaking works of glass designed by internationally renowned designers and crafted by Czech glassmakers.

Quality
Quality is an essential choice for us at all stages of product development, manufacturing, transportation, and after–sales services.
